AI-tivity: Independent Exploration of ChatGPT

Share this activity sheet so that *anyone with the link* can access it.

TASK #1

Think of a personal goal you have or could set for yourself: for example, training to run a marathon, starting a business, or learning a new language or instrument.

Prompt ChatGPT with information about your goal, as well as your current progress and a timeframe you would like to complete it in. Ask ChatGPT to provide you with a daily or weekly plan to reach your goal. Once ChatGPT responds, review the schedule and provide suggestions to ChatGPT about any modifications you would like to make.

Record all of the prompts you use below, as well as your analysis of how ChatGPT was or was not helpful.

Goal	*Learn Python*
Prompts	Prompt #1: If I want to learn Python efficiently, give me a good plan to do so. Prompt #2: Now make a month schedule based on this plan Prompt #3: I don't think web development knowledge is needed for Python. Please make adjustments with the schedule *Write as many prompts as needed to get the most useful response possible!*
Analysis *Did ChatGPT help achieve the goal?*	ChatGPT helped me achieve this goal as it gave in-depth plans and schedules in order to learn Python efficiently within a month. It gave me specific stuff and tips to succeed each day.

TASK #2
Think of at least two ways you might be able to use ChatGPT *that you haven't seen before*. Try them out, and record your efforts in the tables below.

Goal	Generate a Web Development Kahoot.
Prompts	1. Create a Web Development Kahoot 2. Can you add 10 more questions? 3. Split the JavaScript, CSS, and HTML questions into grouped sections
Analysis *Did ChatGPT help achieve the goal?*	ChatGPT helped achieve the goal as it successfully created a Web Development Kahoot that contained questions about HTML, CSS, and Javascript. When I gave it specific instructions such as telling it to split different language questions or adding more questions, it worked precisely and efficiently.

Goal	Create a cram-study session for AP Calculus BC
Prompts	1. Create a cram-study session for AP Calculus BC 2. Instead of making this session as one day, split it into 7 days. 3. Can you explain each day more in-depth on what to do
Analysis *Did ChatGPT help achieve the goal?*	ChatGPT helped me achieve this goal as the cram-study session it generated looked legit and precise. Not only that, it gave additional tips on studying calculus. The modifications I specified were successfully followed.
